

ROLL GATES

WORK SMARTER, HANDLE STRONGER.

REGULAR ROLL GATES

DOUBLE ROLL GATES

FEATURES

ALL AROUND EASE

While other rodeo systems use flip gates, we use sturdy, smooth-running roll gates for easier maneuverability for everyone involved.

SUPERIOR STRENGTH

Our roll doors offer industry-leading strength both when open and closed. Unlike competitors' doors, which are structurally weaker when open, we have engineered our design to maintain superior strength in both positions.

NO ROLLERS IN THE DIRT

Our innovative roller system is always placed on the top bar to keep things running smoothly even in the toughest environments.

EASIER ANIMAL CONTROL

30-inch alleys offer a tighter, more controlled space than competitors, making animal handling and stripping more efficient. The Double Roll Gate features two 30-inch alleys, while the Single Roll Gate features one 30-inch alley.
